## **Exam NS0-170**

### **Cisco and NetApp FlexPod Design**

**Verson: Demo**

**[ Total Questions: 10 ]**

**Question No : 1**

State whether the following statement is true or false. All NetApp Services do not include System Administration Services.

- A. True
- B. False

**Answer: A**

**Question No : 2**

When would the ideal time to use the NetCache DNS Tree Search option?

- A. users will not always provide fully-qualified domain names
- B. users always provide fully-qualified domain names
- C. you want to reduce network traffic
- D. faster resolutions are desired

**Answer: A**

**Question No : 3**

You are asked to build a FlexPod solution using Application Centric Infrastructure (ACI).

What are two ways to address the network requirements for high availability in this scenario? (Choose two.)

- A. Deploy the infrastructure in two data centers.
- B. Deploy a single connected Cisco Application Policy Infrastructure Controller (APIC).
- C. Use physical redundancy across the entire stack.
- D. Configure virtual Port Channels (vPCs).

**Answer: B,D**

**Question No : 4**

Through which of the following requests can't the Browser be directed to the NetCache?

- A. configuring the browser client to use an automaticproxyconfigurationfile
- B. transparent redirection with WCCP on a Cisco router or switch
- C. configuring the browser client to use WCCP
- D. transparent redirection with a Layer 4 switch

**Answer: C**

**Question No : 5**

You are a data center architect at a service provider. You need to configure a new multi-tenant FlexPod service offering.

Which three UCS Manager features will you need to accomplish this task? (Choose three.)

- A. virtualization support
- B. role-based access control
- C. policies
- D. auto discovery
- E. service profiles

**Answer: B,C,E**

**Question No : 6**

You are deploying VMware on a FlexPod and require back up and space efficient cope services for VMware virtual machines.

Which two are required to accomplish this task? (Choose two.)

- A. SnapDrive
- B. FlexClone
- C. Virtual Storage Console
- D. MetroCluster

**Answer: B,C**

**Question No : 7**

State whether the following statement is true or false. The NOW site holds data maintained by the Network Appliance. This information consists of records and customer product information but this data is only available to authorized users.

- A. False
- B. True

**Answer: B**

**Question No : 8**

Which of the following options best describes what the configure "Shared User Hosts" feature that is found under Appliance Manager's Setup > FTP > Caching Behavior is used for?

- A. a shared IP address that all requesting clients will use to circumvent any authentication or user-specific key requirements on the backend FTP servers
- B. FTP servers from which fetched objects will be cached and served without a user-specific key requirement in order to increase the caching efficiency
- C. a subset of FTP servers that will be accelerated by the NetCache appliance
- D. a subset of FTP servers that can be bound to a shared virtual IP address in order to increase overall caching efficiency

**Answer: B**

**Question No : 9**

State whether the following statement is true or false. When configured as an accelerator, the NetCache appliances are typically stationed near the server.

- A. False
- B. True

**Answer: B**

**Question No : 10**

An architect is designing an Oracle FlexPod solution that must support non-disruptive upgrades across all of the hardware components. The Oracle workload requires a 4-node FAS system, including the NetApp CN1610 cluster interconnect switches.

In this scenario, how many 10GbE ISL links are required between the two cluster interconnect switches?

- A. 8
- B. 2
- C. 0
- D. 4

**Answer: D**
